Site is land/some interplay involving several structures. One is tall & angular; the others, a group, have a rounded component & involve some subterranean element. Surrounding land is relatively flat, w/ short grass, probably an encompassing fence. A very noticeable & unpleasant smell ^{is} associated w/ S. Fe. Site or Smells
evokes a pronounced negative emotional feel - incl. by to some extent, fear, reluctance, sadness, uneasiness, etc. feelings, apprehension, etc. People in some way involved w/ site presents site maintains a certain level of tension/ apprehension. At a certain point in the past an event occurred or situation ~~exists~~ existed that was of considerable greater magnitude of vagueness & ambiguity.
